ABOUT ME

Junior full-stack developer graduated with distinction, I have practical experience gained during internships, where I contributed to the creation of REST APIs and user interfaces within agile teams. I am proficient in Java / Spring Boot, Angular / TypeScript, and SQL technologies, and comfortable with containerization via Docker, version control with Git, as well as best testing practices. A fast learner and aware of security issues (elected in a cybersecurity elective), I am motivated to evolve towards enterprise architectures and cloud/DevOps toolchains.

WORK EXPERIENCE

Full stack Java/Angular developer
Cronos Europa | Brussels | Jul 2025 - Jul 2025

- Performed bug fixing and maintenance after production launch to ensure application stability and reliability.
- Integrated the LinkedIn API to enable automated candidate CV data import within the internal CV management tool.
- Optimized complex SQL queries and backend logic to address performance issues and reduce system response times.

Full stack Java/Angular developer
Cronos Europa | Brussels | Feb 2025 - Jun 2025

- Developed and delivered complete user stories, covering front-end, back-end, database, and documentation.
- Created SQL functions for calculations and optimized queries to enhance performance and scalability.
- Executed the migration of legacy data into a new structured schema while ensuring consistency and integrity.

Cashier
Intermarché | Belgium | Aug 2022 - Aug 2023

- Provided friendly and efficient customer service, enhancing the shopping experience.
- Assisted in stocking shelves, conducting inventory checks, and maintaining store cleanliness.
